How to Read the Schedule

To determine when the bus serves a location, match the numbers on the map to the columns of times on the schedule. The bus's stop time is listed after the times for that stop. On the map, blue numbers indicate times when the bus is scheduled to leave a stop; red numbers indicate times when the bus is scheduled to arrive at a stop. The numbers listed for the stops indicate when the bus serves that location. The numbers on the map are adjusted based on the time of day.
